Hunt's Velvet Wonder

ACHIEVEMENT MEDAL WINNER • NATIONAL NEW YORK SHOW

We are proud to offer this excellent introduction as a valuable addition to the Informal Decorative class. The color, a blending of violet-purple and burgundy, and in some lights a *true-purple*, is unmatched by any Dahlias previously offered. *Hunt's Velvet Wonder* possesses all the desirable and pleasing habits found in the better varieties: beautiful, immense blooms, up to 15 inches across, borne on long, sturdy stems, well above foliage that is disease-resistant, dark green and leathery. These magnificent blooms have broad, oval, velvety petals and quilled centers that are solidly packed and of great depth. To Dahlia enthusiasts, we present Mr. Harry Hunt whose other creations will bear watching this fall.

Burnett's Lawn Grass Seed Mixtures

Lawn View of Private Estate Sown with Burnett's "Special" Lawn Grass Seed Mixture.

Burnett's "Special" Lawn Grass Mixture

The above mixture is made from our own formula, and composed of grasses specially adapted for the purposes of producing turf which retains its rich green color and velvety appearance throughout the entire Summer and Fall. In making up this high grade mixture we are careful to use only the very finest quality of all the most desirable dwarf evergreen, recleaned grasses, free from chaff and weeds, which thrive well on any soil, thus ensuring a beautiful and permanent lawn.

1 lb., 60c., 2½ lbs., \$1.40, 5 lbs., \$2.75, 10 lbs., \$5.50, 20 lbs., \$10.50, 100 lbs., \$50.00
(20 lbs. of Burnett's "Special Mixture" is approximately one bushel.)

Burnett's "Killarney" Mixture

Burnett's Lawn Grass Seed Mixture "Killarney" is composed of a combination of the finest Imported and Domestic grasses, the highest grades possible to procure, and specially adapted for this climate. This mixture is composed of all solid, recleaned seeds of the highest germination. Therefore, owners of large estates requiring a permanent sod and everlasting lawn should by all means use this high-grade mixture. If the ground is properly prepared, we are certain "Killarney Mixture" will produce a turf of velvet, equal to the most famous Lawns in Europe. Give it a trial. "Sow Killarney and walk on Velvet."

1 lb., 70c., 2½ lbs., \$1.65, 5 lbs. \$3.25, 12½ lbs., \$8.00, 25 lbs., \$15.50, 100 lbs., \$60.00
(25 lbs. of "Killarney Mixture" is approximately one bushel.)

Burnett's "Central Park" Mixture

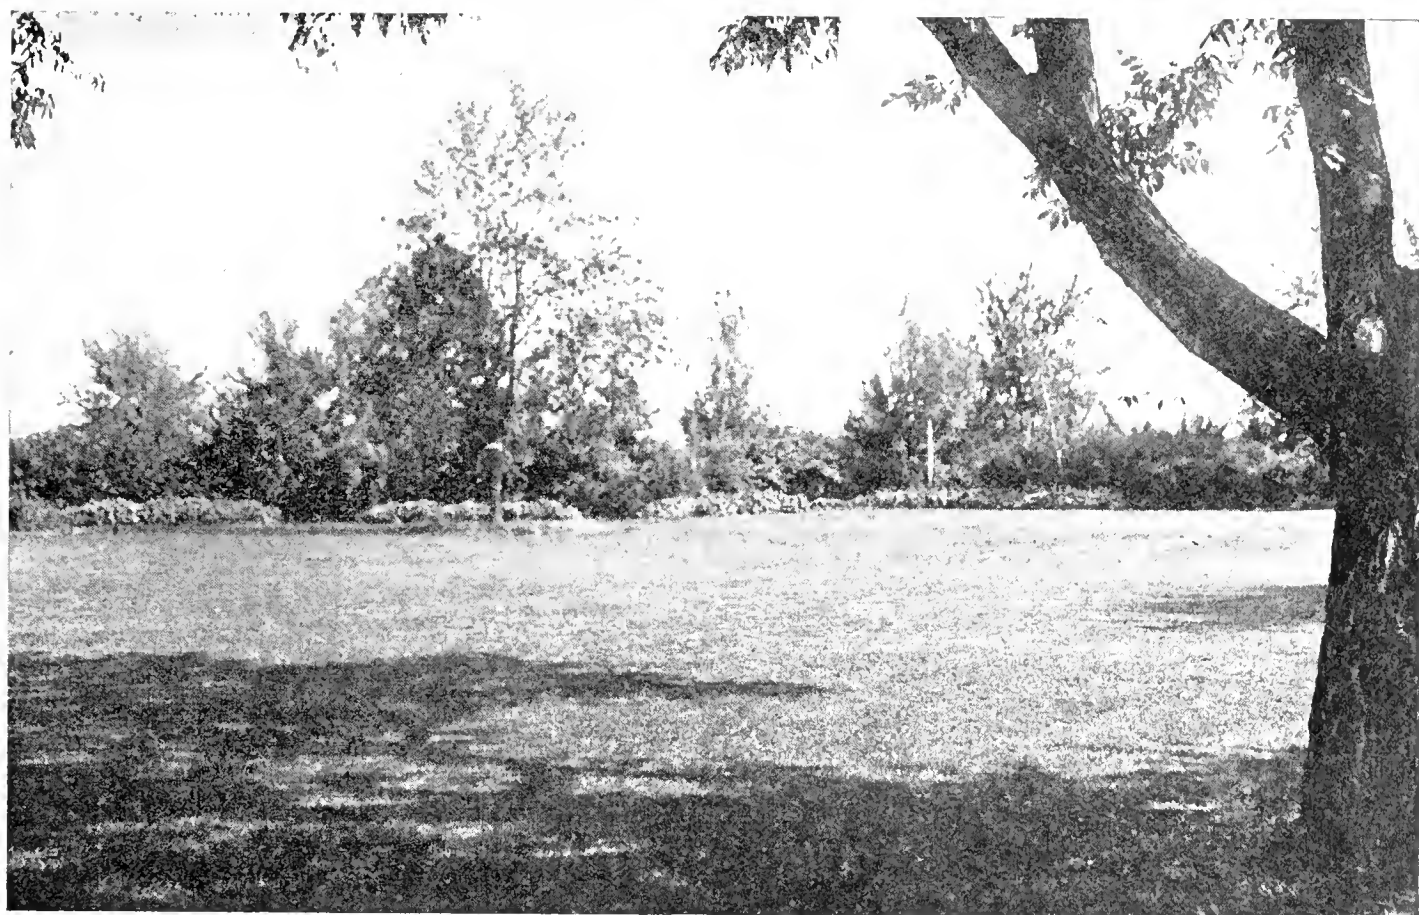

This well-known mixture contains a large proportion of permanent grasses that grow quickly, producing a rich, green sward in about four weeks from time of sowing.

1 lb., 55c., 2½ lbs., \$1.30, 5 lbs., \$2.50, 10 lbs., \$4.75, 20 lbs., \$9.25, 100 lbs., \$45.00
(20 lbs. of "Central Park Mixture" is approximately one bushel)

We recommend sowing 150 lbs. to the acre, 1 lb. to 200 square feet.

Note: To destroy worms in your lawn, use Electric Worm Eradicator. (See page 104.)

Burnett's Lawn Grass Seed Mixtures

View showing Lawn sown with Burnett's "SHADY PLACE" Lawn Grass Seed Mixture.

Burnett's "Shady Place" Mixture

When a lawn is much shaded, either in whole or in part, the shaded portions should be sown with Burnett's "Shady Place" Lawn Grass Seed Mixture, which is a combination of fine, dwarf-growing evergreen varieties, which, in their wild or natural state, are to be found growing in the woods or other sheltered or shady places. Under or in the immediate neighborhood of large trees fertilizers should be applied liberally and frequently, for the trees absorb the fertilizer and impoverish the ground. Ground much shaded is very frequently sour, and if the drainage is defective it is apt to be covered with moss. In such cases an application of lime or wood ashes raked in will sweeten the soil, but the moss should be first removed with a sharp steel-toothed rake.

1 lb., 70c., 2½ lbs., \$1.65, 5 lbs., \$3.25, 10 lbs., \$6.40, 20 lbs., \$12.50, 100 lbs., \$60.00
(20 lbs. of Burnett's "Shady Place Mixture" is approximately one bushel.)

Burnett's "Bank and Terrace" Mixture

On sloping banks it is often necessary to use sod, as heavy rains wash the soil off before the grass seed has time to germinate. It is sometimes even necessary, in sodding very steep banks, to use pins eight or ten inches in length to pin the sods in place, to prevent them from being washed down by excessive rains before the grass roots have had time to fasten in the soil. The Terrace mixture which we offer is composed of deep-rooting grasses which, if once established, will hold the soil and prevent washing, and we advise liberal fertilizer and seeding so that the grasses may be quickly established.

1 lb., 70c., 2½ lbs., \$1.65, 5 lbs., \$3.25, 10 lbs., \$6.40, 20 lbs., \$12.50, 100 lbs., \$60.00
(20 lbs. of Burnett's "Bank and Terrace Mixture" is approximately one bushel.)

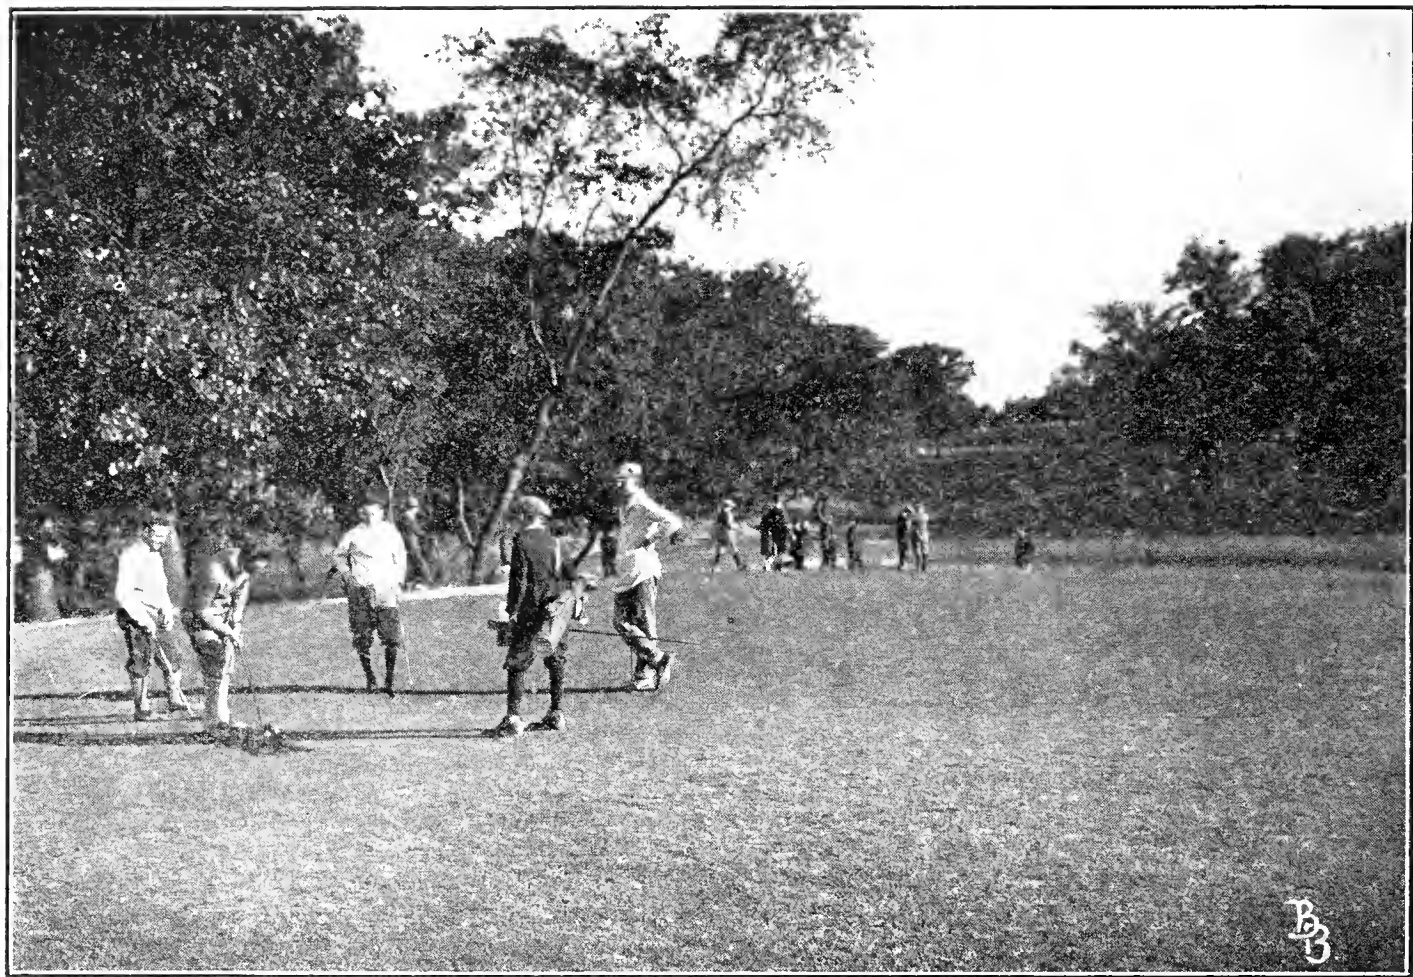

Burnett's "Bentmix" Lawn Seed

A specially mixed formula that includes several of the finest bent grasses, together with such other fine leaved grasses required to obtain that "Putting Green" effect that is becoming more popular each year and yet able to withstand the hard usage to which most lawns are subject.

5 lbs., \$4.75, 10 lbs., \$9.00, 20 lbs., \$17.50, 100 lbs., \$80.00
(20 lbs. of Burnett's "Bentmix" Lawn Seed is approximately one bushel.)

We recommend sowing 150 lbs. to the acre, 1 lb. to 200 square feet.

BURNETT'S GRASSES AND CLOVERS

Hay, Meadow and Permanent Pasture Mixtures

OUR Permanent Pasture, Hay and Meadow Mixtures are composed of varieties of grasses best adapted for producing an abundant and nutritious food supply for stock. Our formulas are arranged with great care and the mixtures are made to suit the exact location and condition of soil, etc., for which they are needed.

Nothing but the best re-cleaned seeds are used, consequently it does not take so large a quantity per acre as that generally used when poor quality mixtures are sown.

We recommend four bushels to one acre, which may be sown either in the Spring or Fall, with an additional ten pounds of Mixed Clovers sown early in the Spring. When ordering please state whether for high, dry, medium, wet or heavy soil.

Now at last you may grow a lovely orange colored Cosmos, and have flowers before frost. The color of this early flowering strain is the same vivid orange of the ordinary Klondyke, with attractive light green foliage. Height 36 to 42 inches.

Marigold—*African* “Yellow Supreme.” Pkt. 25c.

This variety has distinct loose-petaled flowers of a charming shade of pale-yellow, overlaid with a buff sheen. The plants are about 2½ feet tall, and the large individual flowers resemble Carnations. The objectionable Marigold scent is lacking.

Nasturtium—*Double* “Scarlet Gleam.” Pkt. 50c.

Enthusiastically proclaimed as even more dazzling in color than the showy Golden Gleam. The blooms are a fiery orange-scarlet, and of immense size, almost 3 inches across. Plants are semi-dwarf bush with runners averaging 18 inches. Many fragrant flowers are borne well above the foliage on long wiry stems.

Petunia—*Ruffled Nana Compacta* “Martha Washington.” Pkt. 50c.

A unique novelty. Grows to about 9 inches, forms a ball effect smothered with blooms, and has a neat compact habit. The frilled portion of the flower is a beautiful blush pink, and the center veined a rich wine-red deepening to a dark violet. The blooms resemble a Pelargonium. Suitable for borders, bedding, etc.

Zinnia “Fantasy Mixture.” Pkt. 25c; ¼ oz. \$1.00.

The trend of late years has been toward the smaller-flowered, more graceful strains of Zinnias. The round, medium-sized double flowers are composed of a mass of shaggy ray-like petals which give to it a delicate and refined appearance. The color range includes the brightest shades of red and orange as well as the popular pinks and creams.

Burnett's Reliable Flower Seeds

A well planned Old-fashioned Garden

Our list of Flower Seeds has again been carefully revised and comprises only the choicest and most selected types in their respective classes, which we are certain will give satisfaction.
One of the most fascinating and economical ways of making a flower garden is in raising the plants from seed.

All Flower Seeds Postpaid.

Flowers that can be raised from seed are divided into 7 classes, viz:—

- H. A.—Hardy Annuals.** Seeds sown outdoors where they are to bloom; they die after the first year.
- H. H. A.—Half Hardy Annuals.** Those that are sown under glass in the early Spring and transplanted outdoors in April and May.
- H. B.—Hardy Biennials.** Seeds sown outdoors and bloom the next year; some bloom the first year if sown early.
- H. H. B.—Half Hardy Biennials.** Seed sown one year under glass and planted outdoors the following Spring.
- H. P.—Hardy Perennials.** Seeds sown outdoors one year, bloom the next and each succeeding year without protection.
- H. H. P.—Half Hardy Perennials.** These bloom from seed the second year, but need winter protection thereafter.
- G. P.—Greenhouse Plants.** Tender plants for growing under glass.
